### FIELDS OF INTEREST:

Cosmetic and Aesthetic Surgery, Reconstructive Plastic Surgery

If you're looking to transform your body, VASER LipoSelection by Dr Joffily could be the perfect solution.

VASER Lipo is a safe, minimally invasive procedure for removing unwanted body fat, with fast recovery and smooth, predictable results. Whether you're seeking significant fat reduction or precise body sculpturing, this cutting edge technique is for both men and women, and ideal for almost all areas, especially those 'sticking points' that are resistant to diet and exercise.

VASER is performed under local anaesthetic and does not involve the risks of full invasive surgery. The outcomes are comparable to traditional liposuction, but with minimal downtime (2-3 days) and immediate results

Unlike laser technologies, VASER uses the gentle power of ultrasound to select and emulsify targeted fat, leaving the surrounding healthy tissue completely untouched. A small probe delivers the low level ultrasonic vibrations into the area and a unique cannula removes the liquified fat with ease. This fat selective technique is what minimises discomfort and bruising and promotes fast recovery.

To accelerate the recovery, it will be also recommended sessions of lymphatic drainage and the use of proper compression garments, like Yoga.

VASER delivers incredible results, and can treat most areas of your body including your abdomen, waist, back, thighs, arms, buttocks, chest, neck, chin, knees, ankles, and breasts.

VASER Lipo is a proven and trusted solution. If you're ready for a new you, take the first step and arrange a free, discreet, no obligation consultation with Dr Joffily to discuss your aspirations.

Dr Joffily is a highly respected surgeon, with over 10 years of expertise in Aesthetic and Reconstructive Plastic Surgery. Most of his work is from personal recommendations.
